GAIA-MIND SECURITY INTELLIGENCE - RAPPORT D'AUDIT

Date: 19/02/2026 02:28

Target: www.tesla.com

GAIA SECURITY SCORE: 50/100

1. Technical Findings Analysis:

Security audit reveals missing CSP headers on main landing endpoints. While infrastructure is robust, the

lack of UI-redressing protection on login pages does not meet international security standards.

2. Remediation Plan:

```
- Add: X-Frame-Options: SAMEORIGIN

- Setup: Content-Security-Policy (CSP)

- Enable: HSTS (Strict-Transport-Security)
```
